

The Lebanese Sustainable Development Contest

The Green Phoenix Trophies of the Sustainable Development

FAQ Version 1

Information and documents to be downloaded

<http://www.associationleba.org>

What types of projects are covered by the contest?

All domains of sustainable development such as: ecology, environmental protection, green architecture, sustainable development awareness, renewable energy, eco-tourism, organic agriculture but also ... development of local traditions, the development of regional wealth....

Who can compete to the contest?

Students, young entrepreneurs, associations Lebanese and non-Lebanese , private companies , municipalities, In conclusion there is no restriction. What is important is the implementation of projects in Lebanon.

What does it mean the contest categories?

Candidates may apply to two categories of projects:

- The new projects include projects created but not deployed , or specially created for the contest . The list of projects 2009-2010 is an example of new projects.
- The achieved projects: for projects achieved since start of 2010 , or being deployed before the end of the contest.

Upon receipt of the avant-projet and after evaluation of the jury, projects subcategories may be created. For example, the sub-category of ecotourism or green architecture....

Examples of Achieved Projects

A private company that has deployed an ecotourism center.

A municipality that promotes renewable energy.

An association which has deployed selective waste collection.

A group of farmers that promotes organic agriculture,.....

Is the contest is only for Jezzine region?

No. The contest is open to all Lebanese regions.

Is the contest is only for Esib students?

No. All universities and colleges can participate to the contest.

I am a non-Lebanese student or association. Can I participate to the contest?

Of course you can. But the project should be applied to the Lebanon.

Why a business plan is required for new projects ?

In Sustainable development, there is the development term. The aim of the contest is to have feasible projects, and not to remain a paper project. That's the reason for business plan requirement .

Financial prizes?

Actually the total prizes are 10000USD. The prizes will reward innovative new projects after the final decision of the jury.

New realistic or futuristic projects?

There is no limitation to the imagination of candidates, as long as the domain of the project is sustainable development. Nothing prevents a futuristic project to have funding or support of a region.

Favorite subjects?

No favorite subject.

I have a question which is not in the Faq

You can ask it on the contest facebook group <https://www.facebook.com/groups/108781311868/>

Or by email to : info@associationleba.org, and eaouad@easeit.fr
